

## **ALONE WE GO FASTER, TOGETHER WE GO HIGHER!**

A Positive and Results-Driven Conference Packed with Fresh Insights  
***A conference to boost team spirit and achieve more sustainable individual and collective success.***

“ Positive results are rooted in the diversity and complementarity of talents ”

**With this conference based on the documentary Tandem Conquest:**

**WE ADDRESS** practical **challenges of performance and teamwork.**

A team is much more than a gathering of individuals. A team is built slowly and with care, but it's worth the effort:

- 74% of the French community endorse teamwork
- One out of two employees say their productivity increases with teamwork
- An effective team brings pride, joy and fulfillment

How can collective goals and personal ambition coexist? How can individual talent and collective performance be harmonized? How can complementarity and durability be fostered? Executives, managers and professionals... do you want to build an effective team?

[contact@jeromeadam.com](mailto:contact@jeromeadam.com) - +33 (0)951 04 94 49

**WE DISCOVER** that it is far better to know **how to adapt** than to try to control everything.

«When I am hiring, I look for people with unconventional CVs because they won't abandon me at the first challenge and they will know how to apply their imagination to deal with obstacles.»

François Rachline, business executive and economics professor

**WE LEARN** to **communicate honestly** and **welcome feedback**.

“ *Addressing faults, as opposed to staying silent, promotes discussion and allows our feelings to be taken into account.* ”

**WE UNDERSTAND** that **getting positive results is much more than gathering the best and brightest**.

“ *«I won't pick the 23 best players to play on the World Cup team.»*  
*Didier Deschamps, inspired by Claude Onesta* ”

## Themes addressed

- Stop trying to control everything and allow others to help us overcome obstacles
- Share our goals with others and have confidence in their capabilities
- Practice listening and discrimination
- Find joy in what we do and deal with unforeseen events

# Tandem conquest: a breakaway aided by a documentary

(13mn or 26mn – Director: Henri Poulain)

An audacious challenge... To climb Mont Ventoux (French Mountain) by tandem cycling.

On the starting line: «A trailblazer and a pathfinder»

For Jérôme, without tandem, no Ventoux because Jérôme is blind.

For Guillaume, the tandem is the motivation for fulfilling a childhood dream.

From the implementation of the project to the arrival at the summit of Mont Ventoux with a spectacular storm creating a dramatic backdrop, climb aboard this shared epic journey, with a touch of crazy... and increase your energy!

“The powerful breath of life is present everywhere around Jérôme: in his ability to mine positive energy from the deepest recesses; in his feelings felt and expressed; in his ability to direct his thoughts and actions towards a goal. He shows us that accepting our limits and obstacles, together with our ability to question ourselves and be humble, are the foundation of happiness and a peaceful inner life that is open and compassionate with others.”

(President, EQIOM Granulats)
